ABSTRACT

This catalog contains descriptions of the programs funded by governor's grant funds during fiscal 1980. (The governor's grants are funds provided by the Comprehensive Employment and Training Act of 1973 for use at the state level by the state governors.) It is divided into four parts. Part 1, which identifies programs funded under the coordination and special services grant, outlines programs dealing with coordination, planning, technical assistance, rural areas, labor market/occupational information, research, special target populations, economic development, and apprenticeship. Examined next are programs funded under the educational linkages grant, which are targeted in the areas of coordination, technical assistance, information exchange, development and dissemination, expanding educational opportunities, curriculum development, assessment and testing, elimination of artificial barriers, and jointly funded training and services. Activities involving apprenticeship linkages, employment and training for special target populations, labor market and occupational information, coordination, and cooperative efforts are summarized next. Presented in part 4 is a state-by-state list of resource persons who may be contacted for further information on programs. (A companion report containing an overview of the intended utilization of governor's grants in the states is available separately through ERIC--see note.) (MN)

National Governors' Association
Employment and Vocational Training Program

The National Governors' Association, founded in 1908 as the National Governors' Conference, is the instrument through which the Governors of the fifty states and the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands collectively influence the development and implementation of national policy and apply creative leadership to state problems. The Association works closely with the Administration and the Congress on state-federal policy issues from its offices in the Hall of the States in Washington, D.C. Through its Center for Policy Research, the Association also serves as a vehicle for sharing knowledge of innovative programs among the states and provides technical assistance to Governors on a wide range of issues.

Catalog of CETA Governors' Grants Programs and Activities, Volume II, is a publication of NGA's Employment and Vocational Training Program funded through a policy analysis grant from the Office of Policy, Evaluation, and Research of the Employment and Training Administration, U.S. Department of Labor. The Catalog was compiled with the assistance of Pamela King, an NGA State Fellow from the Indiana Office of Occupational Development, and James Foley, State Fellow from the Montana Department of Labor and Industry, in conjunction with the staff of NGA's Employment and Vocational Training Program. As a final product of their research and consultation, the document also owes much to the insights and assistance of many helpful people in the employment and training world.

Organizations undertaking projects of this nature under U.S. Government sponsorship are encouraged to express their findings and judgments freely. Inclusions of descriptions of programs, points of view, or opinions expressed in this publication do not necessarily represent endorsement by the U.S. Department of Labor or the National Governors' Association.

INTRODUCTION

Background

Over the years that the Governors' grants have been in existence, the National Governors' Association has been the only organization which has attempted to compile information on how States plan to use these funds. This activity has resulted in the publication of: The Governors and CETA: A Profile of Special Manpower Grants Activities, in May of 1977; Utilization of Governors' Discretionary Grant Funds under CETA, in August of 1978; and Governors' Youth Programs: Overview Fiscal Year 79, which was subsequently issued as part of the Knowledge Development Series of the Office of Youth Programs, U.S. Department of Labor, under the title, The State Role in Youth Employment and Training Programs, in May of 1980. These publications, in addition to the current two-volume report for Fiscal Year 1980, provide the most comprehensive picture to date, of the utilization of Governors' grants.

During Calendar Year 1980, the Employment and Vocational Training Program (EVTP) of the National Governors' Association conducted a nationwide survey of the States for the purpose of compiling an information base on Governors' grant activities authorized under the Comprehensive Employment and Training Act (CETA). A companion report (Volume I) entitled, Overview 80: Governors and CETA, is being published simultaneously with this Catalog. Volume I presents a broad-brush description of the intended utilization of Governors' grants in the States with special emphasis on the organizational administering of the funds. Included is information on (1) the role and operation of the State Employment and Training Councils (SETCs); (2) the allocation mechanisms employed by the States to distribute funds; and (3) the type of activities and organizations to be funded under the various Governors' grants. A legislative overview of the Governors' grants is also provided.

This volume (Volume II) concentrates on the programmatic use of Governors' grant funds in each State through a catalog of program descriptions. Included are brief summaries of programs/activities planned for implementation in each State using the 4-percent (Coordination and Special Services), the 1-percent (Educational Linkages), and the 5-percent (Special Statewide Youth Services) Governors' grants. The compilation of these programs is intended to provide State and Federal policy makers with a profile of Governors' grant activities. It is expected that the descriptions will be useful to practitioners in the employment and training system as well.

The programs included in this report were identified by examining the Governors' grant annual plans for Fiscal Year 1980. Further, a survey requesting additional information and program profiles was sent to all the States. This was then supplemented by follow-up telephone interviews.

Caution is advised in reviewing the program descriptions contained within the Catalog. Despite good efforts, not all States are represented. Of those that are, the information typically concerns planned, not actual, activities. Furthermore, where program costs are described, the information is sometimes incomplete; this is because certain respondent States were planning to allocate funds for various activities but were unable to specify an exact dollar amount, or, they were able to provide specific dollar information for only some of their planned programs/activities. Notwithstanding these problems, the Catalog reflects the intended programmatic direction of States with respect to their utilization of Governors' grant funds.

Use of the Catalog

The Catalog is divided into four parts. Part I identifies the programs funded under the Coordination and Special Services (4 percent of Title II-B, Sec. 105). Programs are categorized by type of activity as follows:

A. Coordination
B. Planning
C. Technical Assistance
D. Rural Areas
E. Labor Market/Occupational Information
F. Research
G. Special Target Populations
H. Economic Development
I. Apprenticeship
J. Other

Part II identifies the programs funded under the Educational Linkages grant (1 percent of total Title II funds, Sec. 202 (d)). Programs are categorized by type of activity as follows:

A. Coordination
B. Technical Assistance - Prime Sponsors or Local Education Agencies
C. Information Exchange Between Prime Sponsors and Local Education Agencies
D. Development and Dissemination
E. Expanding Educational Opportunities
F. Curriculum Development
G. Assessment and Testing
H. Elimination of Artificial Barriers
I. Training and Services Jointly Funded
J. Other

Part III identifies programs funded under the Special Statewide Youth Services grant (5 percent of Title IV YETP, Sec. 433(a)(2)). The programs are categorized by type of activity as follows:

A. Apprenticeship Linkages
B. Employment and Training for Special Target Populations
C. Labor Market/Occupational Information
D. Coordination
E. Cooperative Efforts
F. Other

Part IV provides the reader with a list of resource persons, by State, who may be contacted if further information on the programs is desired.

For the presentation of material in Parts I through III, a uniform outline has been adopted. This format includes, at the left margin, the following:

- Title
- Subgrantee
- Type (of Program/Activity)
- Description
- Number Served
- Program Cost

At the right margin, the State and specific area within the State to which the program applies, are listed.

The readers will note that "N.I." and "N/A" appear within the format. "N.I.," i.e., No Information, denotes that specific information was not provided to us by the State. "N/A", i.e., Not Applicable, indicates that a certain aspect of the standard format is not relevant for the program description. For example, "Number Served" may not be applicable for the description of a "Coordination Program."

Special Note

The Center for Policy Research of the National Governors' Association, has the responsibility to serve as a vehicle for sharing knowledge of innovative programs among the States. We wish to thank all those States who spent time accumulating the information to contribute to this Catalog and who, in so doing, assisted us in carrying out our mandate.

INDIANA

TITLE: Recruitment Specialist

SUBGRANTEE: Indiana Division of Personnel

TYPE: Other AREA: Statewide

DESCRIPTION: Many agencies and institutions in the past have discriminated against members of special segment groups. These special segment groups, e.g., minorities, women, older workers and the handicapped, became discouraged from applying for positions within state government. Since these agencies and institutions have become aware of their responsibilities as equal opportunity employers, it has become necessary to make an aggressive effort to make this committment known. It is important to actively seek out and encourage these special segment groups to apply for positions for which they are qualified. Through these recruitment efforts, agencies and institutions reaffirm their committment to provide equal opportunity employment.

TITLE: Comprehensive Offender Employment Resource System (COERS)

SUBGRANTEE: Boston Employment Resource Center

TYPE: Employment and Training: Offenders

AREA: Three
Urban
Areas

DESCRIPTION: COERS is designed as a network of local "clearinghouses" called Employment Resource Centers (ERC's), initially to be located in the three major urban areas around the State to which most offenders return after leaving the criminal justice system. The Boston ERC will provide the following services: outreach, intake, assessment, pre-employment training, access to education, training and supportive services, placement and follow-up. The creation of a centralized outreach and intake function will result in two major gains:

(1) the elimination of competing, parallel systems that currently confuse clients and inefficiently expend agency resources; and
(2) the improvement of the rate of appropriate referrals to other agencies through the use of a standard and comprehensive intake instrument.
